🔗 Dinaz-12

SUMMARY

Data Science undergraduate interested in Data Engineering and Business Intelligence. Skilled in SQL, Python, ETL, data modeling, and databases including MySQL, MS SQL Server, Oracle, and SQLite. Experienced in building data warehouses, ETL pipelines, analytical dashboards, and AI-powered NL2SQL solutions. Proficient in data analysis, visualization, API integration, and automation, with a passion for developing scalable data-driven solutions.

EDUCATION

BSc (Hons) in IT Specializing in Data Science

Nov 2023 - Present

Sri Lanka Institute of Information Technology (SLIIT)

- GPA : 3.51 / 4.00

R/ Ferguson High School - Ratnapura

2008 - 2021

G.C.E. Advanced Level in the Arts Stream

- Information Technology | Business Statistics | Japanese Language

RELEVANT COURSEWORK

- Machine Learning | Data Mining | Database Systems | Data Visualization | Software Engineering | Artificial Intelligence | Statistics

TECHNICAL SKILLS

- **Programming:** Python, R, SQL, JavaScript, Java
- **AI/ML & Data Science:** Pandas, NumPy, Scikit-learn, Machine Learning, Regression, Model Evaluation, Data Cleaning, Feature Engineering, Data Preprocessing, EDA, Natural Language to SQL (NL2SQL), Prompt Engineering, AI-Powered Data Analytics
- **AI Engineering:** AI Chatbots, Gemini API Integration, Predictive Modeling, AI Experimentation
- **Data Visualization:** Power BI, Plotly, Matplotlib, Seaborn, Interactive Dashboards, KPI Reporting
- **Web & Backend Development:** React.js, Node.js, Express.js, Flask, REST APIs, HTML, CSS, Tailwind CSS
- **Databases:** MySQL, MongoDB, MS SQL Server, Oracle, SQLite
- **Tools & Platforms:** Git, GitHub, Git Workflows, VS Code, Postman, SSIS, SSAS, Excel (Advanced), Power Query, Streamlit, Streamlit Cloud, Jupyter Notebook, EmailJS, Vercel
- **Concepts:** ETL, Data Warehousing, Business Intelligence (BI), Data Analytics Automation, Natural Language Interfaces, API Integration, MVC, OOP, Data Modeling, TanStack Router

PROJECTS

Banking Data Warehouse Project ([GitHub](#))

- Built a SQL Server data warehouse using Star Schema and dimensional modeling
- Developed ETL pipelines with SSIS for data integration and transformation
- Created SSAS OLAP cubes and Power BI dashboards for business reporting

AI Data Analysis Assistant ([Live Demo](#))

- Developed an AI-powered analytics platform using Python, SQL, Streamlit, and Gemini AI
- Built a Natural Language-to-SQL system for automated querying, reporting, and insight generation
- Created interactive dashboards and deployed a responsive web application

Student Help Desk AI Chatbot ([Live Demo](#))

- Built an AI chatbot using Python and Gemini API to answer student queries
- Implemented PDF-based semantic search and context-aware response generation
- Deployed the application on Streamlit Cloud

Customer Behavior Data Analytics Dashboard ([GitHub](#))

- Analyzed 10,000+ customer records using Python, SQL, and Power BI
- Performed data cleaning, EDA, and customer behavior analysis
- Built interactive dashboards for KPI monitoring and business insights

Laptop Price Prediction Web Application ([GitHub](#))

- Developed a machine learning model achieving 85% prediction accuracy
- Applied feature engineering and hyperparameter tuning using GridSearchCV
- Built and deployed a Flask-based web application for real-time predictions

Fintech Customer Analytics ([GitHub](#))

- Performed customer segmentation, loan risk analysis, and financial analytics
- Used Python and Pandas for data preprocessing and trend analysis
- Developed Power BI dashboards for KPI tracking and business reporting

Northbridge University Management System ([GitHub](#))

- Built a full-stack campus management system using React, Spring Boot, and SQL Server
- Developed REST APIs with authentication and role-based access control
- Implemented dashboards, booking workflows, and report generation features

Impact of Collaborative Learning on Communication Skills

- Analyzed 130K+ PISA records using R for statistical modeling
- Conducted data preprocessing, correlation analysis, and linear regression
- Evaluated model performance using ANOVA, p-values, and R^2 metrics

Tea Plantation Management System ([Live Demo](#))

- Developed a full-stack workforce management platform for tea plantations
- Integrated GPS tracking, QR attendance, and weather data services
- Improved operational efficiency through automated workforce monitoring

Personal Portfolio Website ([Live Demo](#))

- Built a responsive portfolio website using React, TypeScript, and Tailwind CSS
- Integrated EmailJS for contact form automation and email delivery
- Deployed and maintained the application on Vercel

CERTIFICATIONS

- **AI/ML Engineer** — Stage 1 (SLIIT)
- **AI/ML Engineer** — Stage 2 (SLIIT)
- **Python Programming** — University of Moratuwa
- **Python 101 for Data Science** — IBM Cognitive Class
- **MongoDB Administration & Monitoring Certifications** - MongoDB University
- **Intro to Machine Learning** - Kaggle
- **Intermediate Machine Learning** - Kaggle
